

Review policy positions

Read the fact sheet called *Five step approach to advocacy* which sums up, very briefly, the material that we covered in the webinar. Then, read the fact sheet on *Preparing policy positions*.

There are a selection of policy positions, from different organisations, to review. Aim to review two.

What do you regard as strengths of the papers? What could they have done better? If you were the policy maker, would you be persuaded? If not, what would you do differently to make a more compelling case?
