## BEST-Dialogue 2014-2019

Dar es Salaam 26 September 2019

## Results Framework (RFM) for Development Engagement Partner – BEST-Dialogue 2014-2019

The RFM facilitates a uniform presentation of the Development Engagement during its implementation.

| Thematic Programme |        | Business Sector Programme Support, Phase IV                                   |   |  |  |
|--------------------|--------|---|---|--|--|
| Thematic Prog      | gramme | Improved employment and income opportunities for farmers and micro, small     |   |  |  |
| Objective          |        | and medium enterprises (MSMEs) through green inclusive growth.                |   |  |  |
| Impact Indicat     | tor    |   | ue of non-traditional export products traded into EAC markets increases   |  |  |
|                    |        | to at least 20% above the current value of US\$ 512 million from 2017 by 2021 |   |  |  |
| D 1:               | T.,    | (Economic Survey)   |   |  |  |
| Baseline           | Year   | 2016  | US\$ 430.8 million (NBS source)   |  |  |
|                    |        |   | BEST-Dialogue has opted to use <i>National Bureau of Statistics data</i> as a source for this impact indicator. There is no latest <i>Economic Survey</i> |  |  |
|                    |        |   | report.   |  |  |
| Results            | Year   | 2019  | * Non-traditional products: Gold, diamond, manufactured goods,  |  |  |
| Tiesures           | 1001   | 2013  | manufactured coffee, manufactured tobacco, fish and fish products,  |  |  |
|                    |        |   | and horticultural products.   |  |  |
|                    |        |   | * Traditional products include: Coffee, cotton, sisal, tea, tobacco,  |  |  |
|                    |        |   | cashew nuts and cloves.   |  |  |
|                    |        |   |   |  |  |
|                    |        |   | Kindly note: The latest available <i>Economic Survey</i> report is of 2017 and  |  |  |
|                    |        |   | does not reflect the mentioned current value of US\$ 512 million, value   |  |  |
|                    |        |   | of non-traditional export products into EAC.  |  |  |
|                    |        |   | BEST-Dialogue has opted for National Bureau of Statistics (NBS) data  |  |  |
|                    |        |   | to report on this impact indicator. In reality,   |  |  |
|                    |        |   | ,,,   |  |  |
|                    |        |   | For 2017: Total value of non-traditional export products (EAC) was  |  |  |
|                    |        |   | US\$ 430.3 million  |  |  |
|                    |        |   | For 2018: Total value of non-traditional export products (EAC) was US\$   |  |  |
|                    |        |   | 500.3 million   |  |  |
|                    |        |   | No data available for January-June 2019   |  |  |
|                    |        |   | (Source: ITC calculation based on National Bureau of Statistics – NBS   |  |  |
|                    |        |   | statistics, 2018)   |  |  |
|                    |        |   | With the exception of gold and horticultural products, all other non-   |  |  |
|                    |        |   | traditional exports declined between 2016 and 2017. Between 2017  |  |  |
|                    |        |   | and 2018, total value of non-traditional export value increased with all  |  |  |
|                    |        |   | sub-categories recording growth with a significant performance  |  |  |
|                    |        |   | registered in manufactured goods and gold exports. The good   |  |  |
|                    |        |   | performance in gold exports was explained by an increase in volume  |  |  |
|                    |        |   | and world market prices.  |  |  |

| Thematic Programme | Business Sector Programme Support, Phase IV                                  |  |
|--------------------|--|--|
| Thematic Programme | Improved employment and income opportunities for farmers and micro, small    |  |
| Objective          | and medium enterprises (MSMEs) through green inclusive growth.               |  |
| Impact Indicator   | The percentage of reforms on opening a business, trading across borders and  |  |
|                    | protecting investors being implemented by Government of Tanzania increases   |  |
|                    | from 10, 25 and 0% to 40, 50 and 20% respectively from 2016 (OECD Investment |  |
|                    | Policy Reviews, Tanzania 2021)   |  |

| Baseline | Year | 2016 | 78.93% opening a business, 20.21% trading across borders, 40.00% protecting investors.  BEST-Dialogue has opted to use <i>Doing Business</i> reports as a source for this impact indicator. There is no latest <i>OECD Investment Policy Reviews for Tanzania;</i> the last report was of 2013.   |
|----------|------|------|---|
| Results  | Year | 2019 | Opening a business scored 72.65 percent. Facilitating trade across borders scored 20.21 percent. Protecting investors scored 45.00 percent.  *In opening a business, DB-2019 Tanzania is ranked at 163 with a score of 72.65 percent, a slight drop of 0.38 compared to a rank of 162 with a score of 73.03 percent in the DB-2018 report. In DB-2017, Tanzania is ranked at 135 with a score of 79.14 percent. In 2017/2018 Tanzania made starting a business easier by launching an online company registration system and eliminated the requirement for inspections by health, town and land officers as a prerequisite for a business license hence reducing time and costs for entrepreneurs.  *Trading across borders, protecting investors, and resolving insolvency has been named among the challenging issues in DB-2019 for Tanzania. Despite Tanzania reducing the time for both exporting and importing goods and services by implementing the Tanzania Customs Integrated System (TANCIS) - an online system for downloading and processing customs documents, and upgrading the infrastructure at the port in 2015, facilitating trade across border the score has still remained the same at 20.21 percent since 2016. In DB-2019 Tanzania is ranked at 183 with a score of 20.21 percent, compared to a rank of 182 with the same score of 20.21 percent, compared to a rank of 182 with the same score of 20.21 percent in DB-2018. In DB-2017 Tanzania was ranked at 180 with the same score again of 20.21 percent. On the other hand, Tanzania made importing more difficult by introducing a requirement to obtain a certificate of conformity before the imported goods are shipped.  *In protecting investors Tanzania is ranked at 131 with a score of 45 percent, which is the same score as in the DB-2018 report with a rank of 129. In DB-2017, protecting investors was ranked at 145 with a score of 40.00 percent.  Overall, Tanzania is ranked at 144 <sup>th</sup> position in the World Doing Business report, 2019 with a score of 53.63 percent compared to a score of 54.04 percent at a rank of |

| <b>Engagement Title</b> | Business Environment Strengthening in Tanzania - Dialogue                       |
|-------------------------|---|
| Outcome                 | Private Sector influences the public sector to improve the business environment |
|                         | in a well-informed, sustained dialogue in an open and transparent space.        |

4

MoU between ACT and PO-RALG approved and signed in July 2019.

<sup>&</sup>lt;sup>4</sup> Memorandum of Understanding (MoU) between MoA and ACT to establish a sector specific dialogue platform was signed in 2018. MoA and ACT agreed to work on the Budgetary Process; Digital Farmer Aggregation Platform; collaborative effort in establishment of Law for Agricultural Land; Agricultural Shows (Nane Nane); International Livestock Show; Data and Information Sharing; Evaluation and implementation of MoU (2017-2020).

<sup>&</sup>lt;sup>5</sup> TCT and MNRT agreed that business environment issues emanating from the Blueprint should be addressed through PPD platforms for sector specific issues while cross cutting issues should be channelled through the multi-sectoral platforms at national level.

<sup>&</sup>lt;sup>12</sup> The Director responsible for land and forest from the Ministry of Tourism and Natural Resources updated participants on government's progress with implementing the measurement recommendations and the improved permit issuing processes. This was also confirmed by the timber stakeholders where they testified that out of 100 timber harvest permits issued by the government each year more than 90% now goes to the relevant stakeholders and with less bureaucracy as compared to the previous experience where the permits were controlled by middle-men. The good outcome of the meeting held was a formation of timber stakeholder's platform that will continue to function even after BEST-D has phased out.
